DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: (a) claims 7-8, wherein the "video processor" of claim 1 is included in the "control unit" of claim 1; (b) claim 9, wherein the "video processor" of claim 1 is included in the "display unit" of claim 1; (c) claim 10, wherein the "video processor" of claim 1 is integrated in "a connection unit for connecting the proximal end of the umbilical cable to an external unit."

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

This application contains further claims directed to the following patentably distinct species of the claimed invention: (a) claim 14, wherein the "switch means" of claim 11 is integrated in the "control unit" of claim 1; (b) claim 15, wherein the "switch means" of claim 11 is included in the "display unit" of claim 1; (c) claim 16, wherein the "switch means" of claim 11 is integrated in the "connection unit" of claim 5.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 11 is generic.

Applicant may select a pair of species for prosecution: one from the first group (a), (b), and (c); and one from the second group (a), (b), and (c).

Applicant is advised that a reply to this requirement must include an identification of the pair of species that are elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. John Gresens on 7 April 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
